

FOUNDATIONS · MODULE 4 REFERENCE · V2.0

Platform Feature Reference Card

Six AI platforms · eight key features · banking use cases. The reference card a banker can use to pick the right tool for the job — without crossing a data boundary.

Six AI platforms compared on eight banking-critical features

Features marked "(Plus)", "(Pro)", or "(Advanced)" require a paid subscription. Free-tier capabilities vary and change frequently — verify current availability before recommending to staff or budget committees.

FEATURE	CHATGPT	CLAUDE	M365 COPILOT	GEMINI	NOTEBOOKLM	PERPLEXITY	BEST BANKING USE
Deep Research & Web Search	Deep Research mode (Plus)	Limited — no live web by default	Bing-grounded in some contexts	Google Search grounded (free + Advanced)	Not available	Native — all searches cited & web-grounded	Regulatory research, market intelligence, competitive analysis
File Analysis	PDFs, Excel, Word, images (Plus)	PDFs & documents (Pro)	Native SharePoint & OneDrive access	File upload (Gemini Advanced)	Upload sources — semantic querying	Limited file analysis	Loan doc QC, policy analysis, financial statement review
Custom Instructions & Persistent Context	Custom Instructions + Projects (Plus)	System prompts in Projects (Pro)	Not configurable at staff level	Gems — custom instruction sets (Adv.)	Per-Notebook instructions	Spaces with custom instructions (Pro)	Persistent role context, brand voice, compliance guardrails
Long Context Window	128K tokens (Plus)	200K tokens — industry-leading (Pro)	Limited to specific document context	1M tokens (Advanced)	Up to ~500K words across sources	Standard context window	Lengthy regulatory docs, multi-file analysis, full policy review
Voice Mode	Advanced Voice Mode (Plus)	Not available	Teams integration (transcription + summary)	Available on mobile (free)	Audio overview generation (async)	Not available	Hands-free drafting, meeting transcription, on-the-go research
Image Generation	DALL-E 3 (Plus)	Not available	Designer integration for image gen	Imagen 3 (Advanced)	Not available	Not available	Marketing mockups, presentation graphics, training visuals

FEATURE	CHATGPT	CLAUDE	M365 COPILOT	GEMINI	NOTEBOOKLM	PERPLEXITY	BEST BANKING USE
Workspace Integration	GPT connectors (beta)	Limited integrations	Native Outlook, Teams, Word, Excel, SharePoint	Native Google Workspace integration	Google Drive integration	Limited integrations	Email drafting, meeting summaries, document creation in- workflow
Code & Data Analysis	Code Interpreter & Adv. Data Analysis (Plus)	Strong code analysis (Pro)	Excel Copilot for spreadsheet analysis	Code execution available (Advanced)	Not available	Limited	Loan data analysis, charts, Excel automation, variance reports

Data classification reminder. Before uploading any document, classify:

- T1** Public — any approved platform permitted.
- T2** Internal Only — enterprise-licensed tools only (M365 Copilot, Google Workspace).
- T3** Restricted / PII — prohibited in all AI tools, including enterprise platforms.

When in doubt, classify up. See Foundations Module 5 — Safe Use Guardrails.

Recommended setup by department

The platform that fits a department depends on what they do every day. Three priority features and one or two platforms per role — the rest is preference.

DEPARTMENT	PRIORITY FEATURES	RECOMMENDED PLATFORM	EXAMPLE USE CASE
Lending	File Analysis · Deep Research · Custom Instructions	ChatGPT Plus + Perplexity	Upload a loan package to ChatGPT to flag missing docs; use Perplexity to research borrower industry and recent regulatory updates.
Compliance	Long Context · Deep Research · File Analysis	Claude Pro + NotebookLM	Load the full SR 26-2 guidance (which superseded SR 11-7) and Reg B into NotebookLM; use Claude for adverse-action language review against approved templates.
Retail / Branch	Voice Mode · Custom Instructions · Workspace Integration	M365 Copilot (enterprise) or ChatGPT Plus	Transcribe and summarize customer meetings; draft follow-up emails using approved templates and placeholders.
Marketing	Custom Instructions · Image Generation · File Analysis	ChatGPT Plus + Gemini Advanced	Maintain brand voice in Custom Instructions; generate campaign mockups with DALL-E and Imagen; refine copy against compliance disclosures.
BSA / AML	Approved enterprise environment only · Long Context · Custom Instructions	Approved enterprise AI (no public tools)	Draft SAR narratives from analyst notes; structure CDD baselines; never input customer-specific data into public AI.
IT / InfoSec	Code & Data Analysis · Workspace Integration · Deep Research	Claude Pro + M365 Copilot	Vendor security questionnaire review; code review for internal scripts; CVE / threat research with cited sources.

The platform-agnostic discipline

Whichever tool you choose, the rules are the same: **strip the specifics, ask clearly, fact-check outputs, escalate risky decisions**. The platform changes the buttons. It does not change the responsibility.
