

Platform Feature Reference Card

Six AI Platforms · Eight Key Features · Banking Use Cases · v1.0 — April 2026

FEATURE COMPARISON MATRIX

Features marked "(Plus)", "(Pro)", or "(Advanced)" require a paid subscription. Free tier capabilities vary and change frequently — verify current availability before recommending to staff or budget committees.

Feature	ChatGPT	Claude	M365 Copilot	Gemini	NotebookLM	Perplexity	Best Banking Use
Deep Research & Web Search	Deep Research mode (Plus required)	Limited — no live web by default	Bing-grounded in some contexts	Google Search grounded (free + Advanced)	Not available	Native — all searches cited & web-grounded	Regulatory research, market intelligence, competitive analysis
File Analysis	PDFs, Excel, Word, images (Plus)	PDFs & documents (Pro)	Native SharePoint & OneDrive access	File upload (Gemini Advanced)	Upload sources — semantic querying	Limited file analysis	Loan doc QC, policy analysis, financial statement review
Custom Instructions & Persistent Context	Custom Instructions + Projects (Plus)	System prompts in Projects (Pro)	Not configurable at staff level	Gems — custom instruction sets (Adv.)	Per-Notebook instructions	Spaces with custom instructions (Pro)	Persistent role context, brand voice, compliance guardrails
Long Context Window	128K tokens (Plus)	200K tokens — industry-leading (Pro)	Limited to specific document context	1M tokens (Advanced)	Up to ~500K words across sources	Standard context window	Lengthy regulatory docs, multi-file analysis, full policy review
Voice Mode	Advanced Voice Mode (Plus)	Not available	Teams integration (transcription + summary)	Available on mobile (free)	Audio overview generation (async)	Not available	Hands-free drafting, meeting transcription, on-the-go research
Image Generation	DALL-E 3 (Plus)	Not available	Designer integration for image gen	Imagen 3 (Advanced)	Not available	Not available	Marketing mockups, presentation graphics, training visuals
Workspace Integration	GPT connectors (beta)	Limited integrations	Native Outlook, Teams, Word, Excel, SharePoint	Native Google Workspace integration	Google Drive integration	Limited integrations	Email drafting, meeting summaries, document creation in-workflow
Code & Data Analysis	Code Interpreter & Adv. Data Analysis (Plus)	Strong code analysis (Pro)	Excel Copilot for spreadsheet analysis	Code execution available (Advanced)	Not available	Limited	Loan data analysis, charts, Excel automation, variance reports

Data Classification Reminder

Before uploading any document: Tier 1 (Public) — any platform permitted. Tier 2 (Internal Only) — enterprise-licensed tools only (M365 Copilot, Google Workspace). Tier 3 (Restricted/PII) — PROHIBITED in all AI tools, including enterprise platforms. When in doubt, classify up. See Module 5.

Role-Specific Platform Guide

Recommended Platforms and Features by Department · v1.0 — April 2026

RECOMMENDED SETUP BY DEPARTMENT

Department	Priority Features	Recommended Platform	Example Use Case
Lending	File Analysis, Deep Research, Custom Instructions	ChatGPT Plus + Perplexity	Upload a loan package to ChatGPT to flag missing docs and summarize risk. Use Perplexity for cited sector and borrower research.
Compliance	Web Search + Citations, Semantic Doc Search, Long Context	Perplexity + NotebookLM + Claude	Upload BSA/AML policy to NotebookLM, query against a transaction scenario. Cross-reference with current FinCEN guidance via Perplexity.
Operations	Meeting Summaries, File Analysis, Workflow Automation	Microsoft 365 Copilot or ChatGPT Plus	Auto-generate meeting minutes with Copilot in Teams. Analyze exception report exports in ChatGPT with Code Interpreter.
Marketing	Image Generation, Custom Instructions, Long-Form Writing	ChatGPT Plus + Claude	Build Custom Instructions from brand voice guide. Draft campaign copy in Claude, generate DALL-E 3 visual mockups for stakeholder review.
Retail / Frontline	Quick Drafting, Email Assistance, Knowledge Q&A	Microsoft 365 Copilot or Gemini	Use Copilot in Outlook to draft member responses. Load product knowledge base into NotebookLM for staff Q&A support.
Finance / Accounting	Excel Analysis, Data Interpretation, Report Drafting	Microsoft 365 Copilot or ChatGPT Plus	Excel Copilot for monthly variance analysis. ChatGPT Code Interpreter for loan portfolio visualization and trend reports.

PAID TIER REQUIREMENTS

Prices as of April 2026 — verify before recommending to budget committees. All platforms offer free tiers suitable for initial pilot testing.

Platform	Paid Tier	Key Features Unlocked at Paid Tier
ChatGPT Plus	\$20/mo	File Analysis, DALL-E 3 image gen, Deep Research, Custom Instructions + Projects, Code Interpreter
Claude Pro	\$20/mo	Projects with custom system prompts, 200K context window, extended file analysis, priority access
Perplexity Pro	\$20/mo	Unlimited Pro searches, file uploads, Spaces with custom instructions, model choice
Gemini Advanced	\$20/mo	1M context window, Imagen 3 image gen, Gems (custom instructions), deep Google Workspace integration
Microsoft 365 Copilot	\$30/user/mo	Native Outlook, Teams, Word, Excel, SharePoint integration — requires M365 Business plan
NotebookLM Plus	\$20/mo	Unlimited notebooks, more sources per notebook, priority generation, shared notebooks

Implementation Recommendation

Start with one platform, one department, one use case. Define success criteria before expanding. The highest ROI pattern at community institutions is a skilled user with a custom-instructed platform. Broad deployment without structured training produces marginal results. See the Quick Win Sprint engagement for a structured rollout framework.
