Board / Leadership Briefing Checklist

What to put in front of your board before, during, and after AI rollout. Twelve items, three categories.

For: C-suite preparing AI briefings for board or executive committee 5 min

BEFORE THE BRIEFING — CONTEXT

Four items the board needs to understand the room you're in.

Where the institution stands on AI readiness today (named score or qualitative read).

How peer institutions are positioned (sourced — FDIC bank-find, peer-cohort data).

Which regulators apply (SR 11-7, ECOA / Reg B, Interagency TPRM, BSA/AML, applicable state guidance).

What the board has already approved that may touch AI (tech budget, vendor list, risk appetite statement).

DURING THE BRIEFING — THE DECISIONS

Four items framed as decisions, not status updates.

Scope: what use cases are in (named) and what use cases are explicitly out.

Risk tolerance: what classes of data are allowed through AI tools, signed off by the board.

Governance: who owns the AI use case inventory, who chairs the AI review forum, what cadence.

Investment: what is being funded this cycle, what is being deferred.

AFTER THE BRIEFING — EVIDENCE

Four items the board should expect to see at the next briefing.

The AI use case inventory — what we are running, who owns each, what tier of risk.

Incident log — anything flagged since the last briefing.

Compliance review readiness — what we can show an examiner today.

A scorecard against the AI readiness baseline — what moved, what didn't.

ADAPT BEFORE ADOPTING

These are starters — not final policy.

Every template names a section your institution should change. Bring it to your committee, your auditor, and your examiner before adoption.
