

Platform Feature Reference Card

Six AI platforms · eight key features · banking use cases. The reference card a banker can use to pick the right tool for the job — without crossing a data boundary.

Six AI platforms compared on eight banking-critical features

Features marked "(Plus)", "(Pro)", or "(Advanced)" require a paid subscription. Free-tier capabilities vary and change frequently — verify current availability before recommending to staff or budget committees.

TABLE REFLOWED FOR LARGE PRINT

Deep Research & Web Search

CHATGPT

Deep Research mode (Plus)

CLAUDE

Limited — no live web by default

M365 COPILOT

Bing-grounded in some contexts

GEMINI

Google Search grounded (free + Advanced)

NOTEBOOKLM

Not available

PERPLEXITY

Native — all searches cited & web-grounded

BEST BANKING USE

Regulatory research, market intelligence, competitive analysis

File Analysis

CHATGPT

PDFs, Excel, Word, images (Plus)

CLAUDE

PDFs & documents (Pro)

M365 COPILOT

Native SharePoint & OneDrive access

GEMINI

File upload (Gemini Advanced)

NOTEBOOKLM

Upload sources — semantic querying

PERPLEXITY

Limited file analysis

BEST BANKING USE

Loan doc QC, policy analysis, financial statement review

Custom Instructions & Persistent Context

CHATGPT

Custom Instructions + Projects
(Plus)

CLAUDE

System prompts in Projects (Pro)

M365 COPILOT

Not configurable at staff level

GEMINI

Gems — custom instruction sets
(Adv.)

NOTEBOOKLM

Per-Notebook instructions

PERPLEXITY

Spaces with custom instructions
(Pro)

BEST BANKING USE

Persistent role context, brand voice,
compliance guardrails

Long Context Window

CHATGPT

128K tokens (Plus)

CLAUDE

200K tokens — industry-leading (Pro)

M365 COPILOT

Limited to specific document context

GEMINI

1M tokens (Advanced)

NOTEBOOKLM

Up to ~500K words across sources

PERPLEXITY

Standard context window

BEST BANKING USE

Lengthy regulatory docs, multi-file analysis, full policy review

Voice Mode

CHATGPT

Advanced Voice Mode (Plus)

CLAUDE

Not available

M365 COPILOT

Teams integration (transcription + summary)

GEMINI

Available on mobile (free)

NOTEBOOKLM

Audio overview generation (async)

PERPLEXITY

Not available

BEST BANKING USE

Hands-free drafting, meeting transcription, on-the-go research

Image Generation

CHATGPT

DALL-E 3 (Plus)

CLAUDE

Not available

Designer integration for image gen

GEMINI

Imagen 3 (Advanced)

NOTEBOOKLM

Not available

PERPLEXITY

Not available

BEST BANKING USE

Marketing mockups, presentation graphics, training visuals

Workspace Integration

CHATGPT

GPT connectors (beta)

CLAUDE

Limited integrations

M365 COPILOT

Native Outlook, Teams, Word, Excel, SharePoint

GEMINI

Native Google Workspace integration

NOTEBOOKLM

Google Drive integration

PERPLEXITY

Limited integrations

BEST BANKING USE

Email drafting, meeting summaries, document creation in-workflow

Code & Data Analysis

CHATGPT

Code Interpreter & Adv. Data Analysis (Plus)

CLAUDE

Strong code analysis (Pro)

M365 COPILOT

Excel Copilot for spreadsheet analysis

GEMINI

Code execution available (Advanced)

NOTEBOOKLM

Not available

PERPLEXITY

Limited

BEST BANKING USE

Loan data analysis, charts, Excel automation, variance reports

Data classification reminder. Before uploading any document, classify:

- T1** Public — any approved platform permitted.
- T2** Internal Only — enterprise-licensed tools only (M365 Copilot, Google Workspace).
- T3** Restricted / PII — prohibited in all AI tools, including enterprise platforms.

When in doubt, classify up. See Foundations Module 5 — Safe Use Guardrails.

Recommended setup by department

The platform that fits a department depends on what they do every day. Three priority features and one or two platforms per role — the rest is preference.

TABLE REFLOWED FOR LARGE PRINT

Lending

PRIORITY FEATURES

File Analysis · Deep Research · Custom Instructions

RECOMMENDED PLATFORM

ChatGPT Plus + Perplexity

EXAMPLE USE CASE

Upload a loan package to ChatGPT to flag missing docs; use Perplexity to research borrower industry and recent regulatory updates.

Compliance

PRIORITY FEATURES

Long Context · Deep Research · File Analysis

RECOMMENDED PLATFORM

Claude Pro + NotebookLM

EXAMPLE USE CASE

Load full SR 11-7 and Reg B documents into NotebookLM; use Claude for adverse-action language review against approved templates.

Retail / Branch

PRIORITY FEATURES

Voice Mode · Custom Instructions · Workspace Integration

RECOMMENDED PLATFORM

M365 Copilot (enterprise) or ChatGPT Plus

EXAMPLE USE CASE

Transcribe and summarize customer meetings; draft follow-up emails using approved templates and placeholders.

Marketing

PRIORITY FEATURES

Custom Instructions · Image Generation · File Analysis

RECOMMENDED PLATFORM

ChatGPT Plus + Gemini Advanced

EXAMPLE USE CASE

Maintain brand voice in Custom Instructions; generate campaign mockups with DALL-E and Imagen; refine copy against compliance disclosures.

BSA / AML

PRIORITY FEATURES

Approved enterprise environment only · Long Context · Custom Instructions

RECOMMENDED PLATFORM

Approved enterprise AI (no public tools)

EXAMPLE USE CASE

Draft SAR narratives from analyst notes; structure CDD baselines; never input customer-specific data into public AI.

IT / InfoSec

PRIORITY FEATURES

Code & Data Analysis · Workspace
Integration · Deep Research

RECOMMENDED PLATFORM

Claude Pro + M365 Copilot

EXAMPLE USE CASE

Vendor security questionnaire
review; code review for internal
scripts; CVE / threat research with
cited sources.

The platform-agnostic discipline

Whichever tool you choose, the rules are the same: **strip the specifics, ask clearly, fact-check outputs, escalate risky decisions.** The platform changes the buttons. It does not change the responsibility.

Sources: AiBI Foundations curriculum, Module 4 — Platform Features Deep Dive; AIEOG AI Lexicon (US Treasury / FBIIC / FSSCC, February 2026). Platform capabilities current as of v2.0 publication; verify before recommending to staff.

This card is a starter artifact, not a vendor approval or security review. Adapt before adoption and verify each platform's current data handling, retention, training, and contract terms before staff use.
