

Start here.

In 45 minutes, turn one workflow problem into a one-page Builder Brief, safe build path, test plan, and launch checklist.

Inside this kit

For operations, branch, compliance, risk, IT, and executive teams that want bankers to turn one annoying workflow into a specific, reviewable internal solution plan before it becomes shadow IT.

1. **01-Banker-Builder-Guide.pdf**

Plain-language guide for turning workflow pain into a build/no-build decision, Builder Brief, safe path, test plan, and handoff.

2. **02-Should-We-Build-This-Scorecard.xlsx**

Editable scorecard with yes/no questions, live score, verdict, recommended action, reviewer notes, and evidence location.

3. **03-Banker-Builder-Brief.docx**

One-page PRD-style banker brief for problem, user, current workflow, proposed solution, must-do items, must-not-do boundaries, data, review, evidence, and handoff.

4. **04-Build-Path-And-Risk-Gate.xlsx**

Editable build-path ladder and data/risk gate workbook with Green, Yellow, Red logic and escalation prompts.

5. **05-Prototype-Test-Plan.docx**

Three-user prototype test plan with permitted test data, acceptance criteria, failure modes, reviewer checks, and final decision.

6. **06-Launch-And-Handoff-Checklist.docx**

Launch and handoff checklist for owner, backup owner, access, support, version, review date, evidence, retention, pause triggers, and kill switch.

7. **07-Safe-First-Builds-Menu.pdf**

Curated menu of low-risk first builds such as job-aid builders, handoff summaries, review checklists, evidence packets, training scenarios, and issue trackers.

8. **08-Builder-Brief-Copy-Paste-Template.txt**

Plain-text copy/paste pattern for moving the final Builder Brief into an internal ticket, review packet, or handoff note.

9. **09-Workflow-SOP-Next-Step.pdf**

Downstream SOP template for documenting approved AI-assisted workflows before repeatable team use.

10. **10-Operations-AI-Workflow-Kit.pdf**

Operations playbook context for turning a useful shortcut into something someone else can run, review, measure, and hand off.

11. **11-Red-Yellow-Green-AI-Use-Card.pdf**

Risk classification reference for allowed, review-required, and prohibited AI use cases.

12. **12-InfoSec-AI-Control-Plane-Kit.pdf**

InfoSec reference for routing, inspecting, logging, gating, and governing AI traffic before shadow AI becomes architecture.

13. **13-Design-Dev-Handoff-Brief.docx**

Scrubbed designer/developer handoff brief for the future interactive Builder Brief experience.

How to use this kit

1. Read the Banker Builder Guide and complete the Should We Build This? Scorecard.
2. Complete the Banker Builder Brief before prompting, tracking, automating, or asking IT for a build.
3. Use the Build Path Selector and Risk Gate to choose the smallest safe path and catch Red triggers early.
4. Run the Prototype Test Plan with permitted test data and a named reviewer.
5. Complete the Launch and Handoff Checklist before reuse.
6. If the workflow becomes repeatable, move it into the AI Workflow SOP Builder.
