

Downloadable Resources Audit & Gap Analysis — Rev 3

Current state of every customer-facing downloadable across the AiBI website after the v2 playbook expansion, UI wiring, and Ledger-era PDF re-skin. What's shipped, what's wired, what remains.

WHAT CHANGED SINCE REV 2

All six role playbooks expanded v1 → v2 (avg 5p → 27p) with operating principles, prepare-vs-decide matrices, R/Y/G tiering, plays with prompt templates, copy-paste templates, 30-day paths, measurement models. Prompt Strategy Cheat Sheet expanded v1 → v2 (2p → 20p). In-Depth Playbook expanded v1 → v2 (5p → 17p). Page-break orphans hunted down across all PDFs. Ledger-era react-pdf docs re-skinned to mockup tokens. All 11 PDFs wired into UI surfaces (`/playbooks/[role]`, `/security`, `/results/sample`, In-Depth purchased page, Foundations M3/M9 artifact registry).

4 — Three-expert workflow applied to every v2 artifact

Each playbook passed through the same chain

1. **Content Lead** — concrete, specific, on-voice. No banned words. No italics. Sentence-case headings. Active voice.
2. **Copy Lead** — Every-style tightening. Scannable structure. No exclamation points. Ledes under 25 words. Bullets parallel.
3. **Banking Operations Consultant** — citations verified: SR 11-7, Interagency TPRM, ECOA / Reg B, GLBA / Reg P, 31 CFR 1020.320, AIEOG AI Lexicon (Feb 2026), GAO-25-107197, FDIC Q4 2024, Gartner via Jack Henry (2025), CFPB Circular 2022-03, OWASP Top 10 for LLM Apps, NIST AI RMF. Red lines flagged. No unsourced statistics.
4. **CMO** — Mockup brand shell. Ink `#071A2F`, gold `#C8A24A`, cream `#F7F3EA`, Inter, single accent, no decorative shadows, seal lockup, citation footer on every doc.
