USE-CASE MAP

Where lending can use AiBI immediately.

Concrete, role-specific use cases replace generic AI advice.

HIGH RISK

Draft an adverse-action letter

Generate an ECOA-aligned decline letter from a decision summary.

Artifact

Adverse-action draft

HIGH RISK

Run a fair-lending pre-check

Test a decision rationale for protected-class signal language.

Artifact

Fair-lending review notes

MED RISK

Summarize a stipulation list

Turn a long stip list into a clean borrower communication.

Artifact

Stipulation summary

MED RISK

Document a loan exception

Write the exception rationale in the standard format reviewers expect.

Artifact

Exception memo

LENDING OPERATING MODEL

A decision rhythm reviewers can defend.

01

Compile

Pull the decision facts: credit, capacity, collateral, conditions, character — and the applicable policy.

Artifact produced

Decision summary

02

Draft

Generate the borrower letter and the file memo in the sandbox using synthetic loan numbers only.

Artifact produced

Draft letter + memo

03

Review

Run the fair-lending pre-check; flag any language that signals protected-class consideration.

Artifact produced

Review notes + flag log

04

File

Send reviewed letter to the borrower; file memo + review log to the loan file.

Artifact produced

Loan file evidence pack

REVIEW CHECKLIST

Before AI output is used.

No protected-class language in any draft

TOOLBOX ASSETS

The playbook ships real tools.

A strong role playbook ends with downloadable, customizable work products — not slides.

LENDING PLAYBOOK

Decisions you can defend. Letters borrowers can understand.

AI is most valuable in lending when it makes the file thicker, not thinner — every artifact ships with reviewer evidence baked in.
