

AiBI Prompt Cards

Structured AI workflows for banking professionals.

Use these cards to frame better inputs, generate clearer outputs, and review AI-assisted work before use.

How to use these cards

1. Choose the workflow. 2. Fill in only non-confidential inputs. 3. Copy the structured prompt into your approved AI tool. 4. Review the output before using it.

Safety reminder

Do not enter confidential customer information, account numbers, or nonpublic personal information into public AI tools. All outputs should be reviewed before use.

Cards

AI Task Framer

FUNDAMENTALS · STARTER

Turn a vague AI request into a clear banking task with context, constraints, and review expectations.

You are a [ROLE]. Using only the context below, complete this task: [TASK]. Context: [CONTEXT]. Constraints: do not assume facts not provided, identify missing information, and separate facts from judgment. Output format: [OUTPUT FORMAT].

Better Prompt Builder

FUNDAMENTALS · STARTER

Rewrite a rough prompt into a complete role-task-format prompt with banking guardrails.

You are a banking prompt coach. Rewrite the rough prompt below into a safer, clearer prompt. Include role, task, inputs, constraints, and output format. Do not add confidential data. Rough prompt: [ROUGH PROMPT]. Banking role: [ROLE]. Required output format: [FORMAT].

Output Quality Checker

FUNDAMENTALS · STARTER

Review an AI draft for unsupported claims, missing context, weak structure, and review risk.

You are a banking quality reviewer. Review the AI output below for unsupported claims, missing facts, compliance-sensitive language, unclear recommendations, and formatting problems. Intended use: [INTENDED USE]. Source context: [SOURCE CONTEXT]. AI output: [AI OUTPUT]. Return a review table with issue, severity, why it matters, and suggested fix.

Risk-Control Mapper

RISK & GOVERNANCE · INTERMEDIATE

Connect an AI use case to likely risks, controls, owners, and review points.

You are a banking risk and controls analyst. Map this AI use case to risks, required controls, accountable owners, and review checkpoints. Use case: [USE CASE]. Data involved: [DATA]. Output audience: [AUDIENCE]. Constraints: do not approve the use case; identify questions and escalation needs. Output as a risk-control table.

Regulator Lens Review

RISK & GOVERNANCE · ADVANCED

Review a proposed AI use through the lens of examiner questions and documentation expectations.

You are reviewing a banking AI use case from an examiner-readiness perspective. Use case: [USE CASE]. Existing controls: [CONTROLS]. Documentation available: [DOCUMENTATION]. Do not invent regulatory citations. Identify examiner questions, documentation gaps, control weaknesses, and suggested next steps.

Decision Log Builder

RISK & GOVERNANCE · INTERMEDIATE

Create a lightweight decision log for AI-assisted work so human judgment remains visible.

You are a banking documentation analyst. Build a concise decision log for the AI-assisted work below. Decision or recommendation: [DECISION]. AI role: [AI ROLE]. Human review performed: [HUMAN REVIEW]. Return a table with date, decision, source inputs, AI contribution, human review, open issues, and owner.

Vendor Risk Snapshot

VENDOR · STARTER

Summarize a vendor relationship into service, data, risk, and review questions.

You are a banking vendor risk analyst. Create a vendor risk snapshot for: [VENDOR]. Service: [SERVICE]. Data access: [DATA ACCESS]. Criticality: [CRITICALITY]. Do not approve the vendor. Identify risk questions, missing documents, and likely review owners.

Vendor Due Diligence

VENDOR · ADVANCED

Structure a vendor due diligence review around documents, risks, gaps, and mitigations.

You are a banking third-party risk reviewer. Review the summarized vendor package below. Package summary: [SUMMARY]. Service criticality: [CRITICALITY]. Known issues: [ISSUES]. Identify due diligence gaps, risk implications, mitigations, and follow-up questions. Do not approve or reject the vendor.

Data Sensitivity Classifier

DATA & COMMUNICATION · STARTER

Classify work examples by data sensitivity before using AI.

You are a banking data classification coach. Classify this work example for AI use. Work example: [EXAMPLE]. Data fields involved: [DATA FIELDS]. Tool type: [TOOL TYPE]. Return classification, what must be removed, whether public AI is appropriate, and safer alternatives.

Customer Communication Simplifier

DATA & COMMUNICATION · INTERMEDIATE

Simplify complex banking language into clearer customer-facing language for review.

You are a banking communication editor. Simplify the draft below for [AUDIENCE]. Draft: [DRAFT]. Required points: [REQUIRED POINTS]. Constraints: preserve meaning, do not add promises, do not create legal or compliance claims, and flag any statement that needs review.

Procedure Simplifier

OPERATIONS · STARTER

Turn dense procedure language into a staff-ready checklist.

You are a banking operations trainer. Convert the approved procedure below into a role-specific checklist. Procedure: [PROCEDURE]. User role: [ROLE]. Task moment: [MOMENT]. Preserve required controls and flag any unclear or missing step. Output as a checklist with review notes.

Meeting Notes -> Action Plan

OPERATIONS · STARTER

Turn meeting notes into decisions, action items, owners, and follow-ups.

You are a banking operations coordinator. Turn the meeting notes below into an action plan. Meeting purpose: [PURPOSE]. Attendee roles: [ROLES]. Notes: [NOTES]. Identify decisions, action items, owners by role, deadlines if stated, open questions, and risks.

AI ROI Framer

STRATEGY · INTERMEDIATE

Frame the expected value, cost, risk, and effort of an AI use case.

You are a banking strategy analyst. Frame the ROI case for this AI use case without inventing numbers. Use case: [USE CASE]. Current process: [CURRENT PROCESS]. Known constraints: [CONSTRAINTS]. Return value drivers, cost drivers, risk factors, assumptions to validate, and pilot metrics.

AI Use Case Prioritizer

STRATEGY · INTERMEDIATE

Rank AI ideas by value, feasibility, risk, and readiness.

You are facilitating AI use case prioritization for a financial institution. Candidate use cases: [USE CASES]. Scoring criteria: [CRITERIA]. Constraints: [CONSTRAINTS]. Score each use case qualitatively for value, feasibility, risk, and readiness. Recommend a pilot order and explain tradeoffs.

Executive Summary Builder

EXECUTIVE · STARTER

Turn raw internal notes into a concise executive summary with decisions and risks.

You are an executive communications analyst for a financial institution. Create a concise executive summary from the source notes. Audience: [AUDIENCE]. Decision needed: [DECISION]. Source notes: [NOTES]. Separate facts, implications, risks, and recommended next steps. Do not add facts not provided.

Board Memo Assistant

EXECUTIVE · ADVANCED

Structure a board memo draft with background, decision, risk, and management recommendation.

You are a board memo drafting assistant for a financial institution. Topic: [TOPIC]. Background facts: [FACTS]. Decision requested: [DECISION]. Draft a structured memo with background, management recommendation, risk considerations, alternatives, and questions for board discussion. Do not add unsupported facts.

Change Log -> Audit Narrative

DOCUMENTATION · INTERMEDIATE

Convert a change log into an audit-ready narrative of what changed, why, who reviewed it, and what evidence exists.

You are a banking audit documentation analyst. Convert this change log into an audit narrative. Change log: [CHANGE LOG]. Reason for change: [REASON]. Review evidence: [EVIDENCE]. Do not invent approvals or dates. Identify missing evidence and open audit questions.

Policy Gap Spotter

DOCUMENTATION · ADVANCED

Compare a proposed practice against an approved policy summary and flag gaps for review.

You are a banking policy review assistant. Compare the proposed practice against the approved policy summary. Policy summary: [POLICY SUMMARY]. Proposed practice: [PRACTICE]. Known constraints: [CONSTRAINTS]. Do not declare compliance. Identify alignment, gaps, questions for the policy owner, and documentation needed.

Training Generator

TRAINING · INTERMEDIATE

Generate a short training module from approved source material.

You are a banking training designer. Create a short training module from approved source material. Audience role: [ROLE]. Time available: [TIME]. Source material: [SOURCE]. Include learning objective, key points, scenario, knowledge check, and manager review note. Do not change the source meaning.

Incident Scenario Builder

TRAINING · ADVANCED

Create realistic tabletop or discussion scenarios for AI, data, vendor, or operational incidents.

You are a banking training scenario designer. Build a fictional incident scenario for training. Theme: [THEME]. Audience: [AUDIENCE]. Learning goal: [GOAL]. Use fabricated details only. Include scenario facts, injects, discussion questions, expected actions, and facilitator notes.
