

DESK REFERENCE - V1

Safe Prompt Placeholder Card

Replace real customer, account, transaction, complaint, credit, BSA/AML, and internal data before asking AI for draft support.

Use uppercase brackets instead of real specifics.

The safest prompting habit is to remove sensitive facts before the prompt. Use consistent placeholders so reviewers can see what was stripped and what must be verified before final use.

SENSITIVE ITEM	USE PLACEHOLDER	NOTES
Customer name	[CUSTOMER]	Use fictional names only in training scenarios.
Account number	[ACCOUNT_NUMBER] or [ACCOUNT_LAST4]	Never paste the real account number into a public AI tool.
Account type	[ACCOUNT_TYPE]	Example: checking, savings, CD, HELOC.
Balance	[BALANCE]	Avoid exact amounts unless in an approved environment.
Amount	[AMOUNT] or [AMOUNT_RANGE]	Ranges are safer than exact values for examples.
Transaction	[TRANSACTION] or [TRANSACTION_PATTERN]	Use pattern-level language where possible.
Date	[DATE] or [DATE_RANGE]	Use if timing matters but identity does not.
Dispute or complaint	[DISPUTE_SUMMARY] or [COMPLAINT_SUMMARY]	Remove identity, account, and event details unless the tool is approved.
Credit reasons	[HUMAN_PROVIDED_REASONS]	AI may clarify; it does not choose, infer, rank, approve, deny, or decide.
SAR / AML facts	[SYNTHETIC_CASE_FACTS]	No real SAR, alert, transaction, or investigation facts in public tools.
Employee or personnel facts	[EMPLOYEE_SCENARIO]	No medical, accommodation, performance, or protected-class details in public tools.
Vendor or security facts	[VENDOR_SUMMARY] or [SECURITY_REQUIREMENT]	Do not paste credentials, API keys, tokens, configurations, or production access details.

● Default stop rule

If the prompt contains a real customer, real account, real transaction, real complaint, real SAR/AML detail, real credential, or examiner-sensitive fact, stop and classify higher before using AI.

Source basis: NIST AI Risk Management Framework, OWASP GenAI Top 10, Interagency Guidance on Third-Party Relationships, CFPB Regulation B, CFPB Regulation P, FFIEC BSA/AML Manual risk concepts, and AiBI data-handling curriculum.

Adapt before adoption: This card is a training aid, not legal advice or an examiner-approved policy. Adapt before adopting it to your institution's approved tools, data classifications, privacy rules, and retention procedures.
