

The AI Banking Institute
Turning Bankers into Builders

SAMPLE READINESS REPORT · V1.0

Your AI Readiness Snapshot — sample

An illustrative example of the report a banker receives after the free 12-question AI Readiness Assessment. The numbers below are not real. Take the assessment for your own.

YOUR SNAPSHOT

Score, maturity tier, and top gap

Structured Beginner

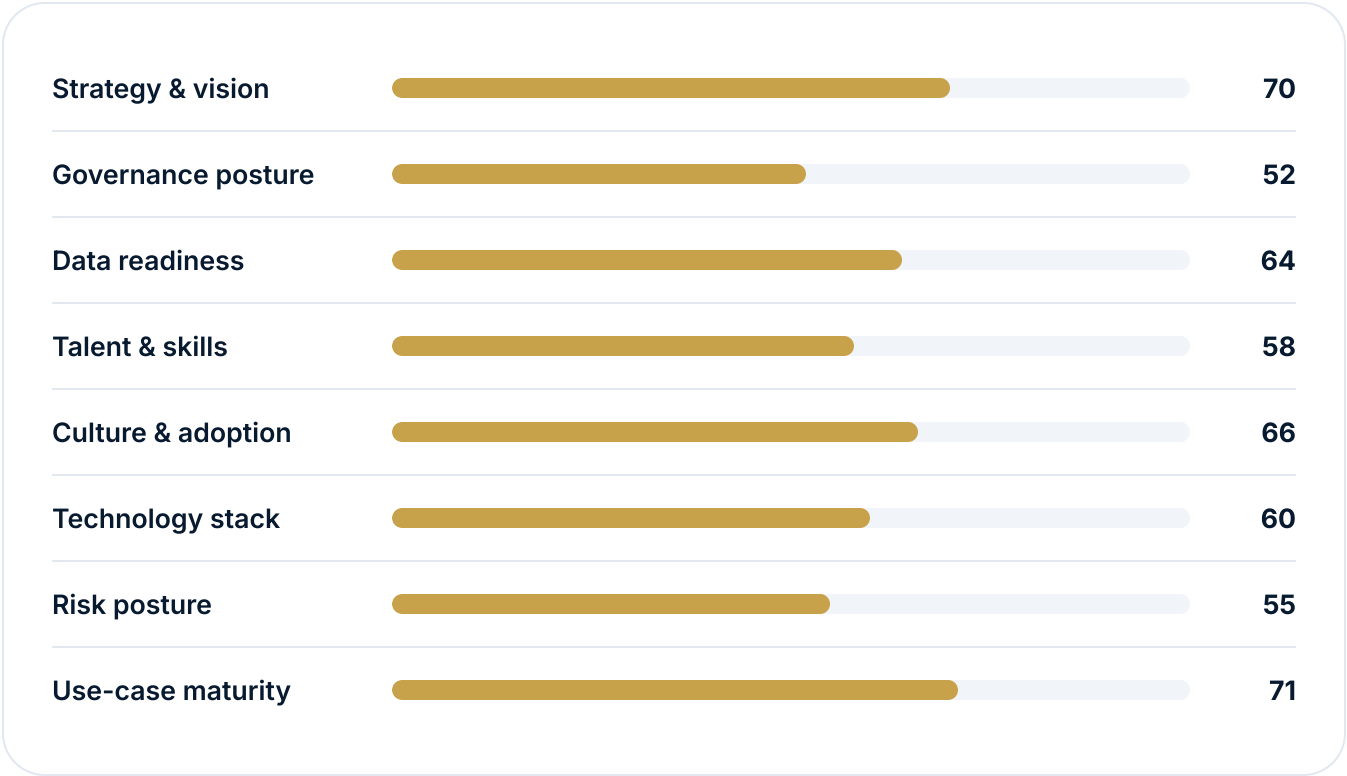

Top gap · Workflow documentation

Recommended path · Foundation course → Workflow SOP → AI use-case checklist

What the score means

A score of 62 places this institution in the **Structured Beginner** band. The bank has informal AI use across departments, an executive conversation underway, and the beginnings of a governance posture — but no written framework, no inventory of use cases, and no documented review path. This is the most common tier for community banks and credit unions today, and the easiest to move out of.

The eight readiness dimensions

The dimension scores are how AiBI separates "where you are" from "where to start." The lowest dimension is not the right starting point. The **highest-leverage** dimension — the one where a 90-day project moves you from "we should look at this" to "we shipped this and it works" — is.

One concrete next step

Every AiBI readiness report ends with a starter artifact — a one-page work product tailored to the lowest-leverage dimension that the recipient can actually use this week. The sample artifact below is the one a Compliance lead in the Structured Beginner band would receive.

STARTER ARTIFACT · AI USE-CASE REVIEW PACKET

A single page your compliance officer prints, signs, and uses every time a department head proposes a new AI use case. The packet captures business purpose, tool, user role, data class, risk tier (Red / Yellow / Green), human reviewer, and review cadence. Pair with the AiBI **Safe AI Use Checklist** and the **Red / Yellow / Green Use Card**.

What you would do with this real report

1. Share the snapshot with your executive team. The conversation is about the highest-leverage dimension, not the lowest.
2. Pick a 90-day win. Foundations course, AI use case inventory, or a measurable pilot in retail / marketing.
3. Book an Executive Briefing with AiBI to map the next four quarters against your actual numbers.

What the In-Depth report adds

The free 12-question assessment is a snapshot. The **In-Depth Readiness Assessment** (\$99) is a 48-question instrument across the same eight dimensions, an anonymized team rollup (when your team takes it), a peer-band comparison, a regulatory exhibit, and a 90-day playbook keyed to your lowest-leverage finding.
