

STARTER TEMPLATE · ADAPT BEFORE ADOPTION

AI Workflow SOP Template

A one-page workflow SOP for any AI-assisted task. Documents the unit examiners actually look at: input, output, retention, review.

WHO IT IS FOR

Operations, compliance, lending, any team running AI-assisted work

FILL TIME

6 min

WHAT'S INSIDE

- 01 Workflow name
- 02 Owner
- 03 Purpose
- 04 Inputs
- 05 AI tool
- 06 Output
- 07 Human review
- 08 Retention
- 09 Exceptions
- 10 Review schedule

SECTION 01

Workflow name

Short, specific. "AI-assisted procedure cleanup for KYC refresh" — not "AI for compliance."

SECTION 02

Owner

Named person and role. One owner per workflow.

SECTION 03

Purpose

One sentence on what this workflow produces and why it exists. The business outcome, not the tooling.

SECTION 04

Inputs

Every input named, classified, and bounded:

- a** Data sources (named systems, named files, or named buckets).
- a** Data class (public / internal / confidential / regulated).
- a** Volume — typical and maximum per run.
- a** Refresh cadence — when inputs are pulled fresh.

SECTION 05

AI tool

The approved tool used in this workflow:

- a** Tool name and version.
- a** Approved-list reference and approval date.
- a** Prompt template ID — the saved prompt this workflow runs.

SECTION 06

Output

What the workflow produces:

- a** Artifact type (document, summary, decision draft, etc.).
- a** Destination — where the output is stored.
- a** Intended consumer — who downstream uses it.

SECTION 07

Human review

The HITL checkpoint:

- a Reviewer role.
- a Review criteria — what the reviewer is checking for.
- a Review evidence — how the reviewer’s attestation is captured (signature, ticket, notation on the artifact).

SECTION 08

Retention

Per [Institution]’s records retention schedule:

- a Input retention period.
- a Output retention period.
- a Prompt / model interaction log retention period.
- a Reviewer attestation retention period.

SECTION 09

Exceptions

What triggers an exception, who decides, and how the exception is documented. Default behavior on exception: stop the workflow and route to the owner.

SECTION 10

Review schedule

When this SOP is re-reviewed:

- a Annually.
- a On tool version change.
- a On a regulatory change applicable to the workflow.
- a On any incident involving this workflow.

SOURCE BASIS

ADAPT BEFORE ADOPTION

This is a starter template, not legal advice or an examiner–approved policy. Replace every [bracketed] placeholder, align the language with your institution’s policies, and route the final document through compliance, risk, and legal review.
