

STARTER TEMPLATE · ADAPT BEFORE ADOPTION

Board / Leadership Briefing Checklist

What to put in front of your board before, during, and after AI rollout.
Twelve items, three categories.

WHO IT IS FOR

C-suite preparing AI briefings for board or executive committee

FILL TIME

5 min

WHAT'S INSIDE

- 01 Before the briefing — context
- 02 During the briefing — the decisions
- 03 After the briefing — evidence

SECTION 01

Before the briefing — context

Four items the board needs to understand the room you're in.

- a Where the institution stands on AI readiness today (named score or qualitative read).
- a How peer institutions are positioned (sourced — FDIC bank-find, peer-cohort data).
- a Which regulators apply (SR 11-7, ECOA / Reg B, Interagency TPRM, BSA/AML, applicable state guidance).
- a What the board has already approved that may touch AI (tech budget, vendor list, risk appetite statement).

SECTION 02

During the briefing — the decisions

Four items framed as decisions, not status updates.

- a Scope: what use cases are in (named) and what use cases are explicitly out.
- a Risk tolerance: what classes of data are allowed through AI tools, signed off by the board.
- a Governance: who owns the AI use case inventory, who chairs the AI review forum, what cadence.
- a Investment: what is being funded this cycle, what is being deferred.

SECTION 03

After the briefing — evidence

Four items the board should expect to see at the next briefing.

- a The AI use case inventory — what we are running, who owns each, what tier of risk.
- a Incident log — anything flagged since the last briefing.
- a Compliance review readiness — what we can show an examiner today.
- a A scorecard against the AI readiness baseline — what moved, what didn't.

SOURCE BASIS

- GAO 25-107197 — no comprehensive AI-specific banking framework yet

ADAPT BEFORE ADOPTION

This is a starter template, not legal advice or an examiner-approved policy. Replace every [bracketed] placeholder, align the language with your institution's policies, and route the final document through compliance, risk, and legal review.
