

STARTER TEMPLATE · ADAPT BEFORE ADOPTION

Go-to-Market Plan for an AI Initiative

A go-to-market plan for launching an AI capability inside a community bank or credit union. Six sections, one page.

WHO IT IS FOR

Marketing, retail, and product leaders launching an AI capability internally or to members

FILL TIME

7 min

WHAT'S INSIDE

- 01 Audience
- 02 Promise
- 03 Proof
- 04 Channels
- 05 Launch timeline
- 06 Metrics

SECTION 01

Audience

Who this is for, in concrete terms. Avoid "all customers" or "all employees." Name the segment, role, or branch tier.

- a Internal audience: which roles, which branches, which department.
- a External audience: which member segment, which channel they engage through.
- a Influencers: examiners, board members, partner credit unions.

SECTION 02

Promise

One sentence the audience can repeat without your help.

- a What changes for them.
- a When it changes.
- a What is not changing (the reassurance side of the promise).

SECTION 03

Proof

What evidence supports the promise, sourced.

- a Internal: pilot results, time savings, sample artifacts produced.
- a External: named industry sources, peer evidence, sourced consumer expectations.
- a Regulatory: the governance and review structure under the capability.

SECTION 04

Channels

Where the message lands.

- a Internal: all-hands, team huddles, intranet, manager talking points.
- a External (members): app, email, branch signage, statement inserts as appropriate.
- a External (industry): peer associations, your regulator relationship, ecosystem partners.

SECTION 05

Launch timeline

Concrete dates. Without dates, this is not a plan.

- a Internal soft launch (small named group).
- a Internal full launch (institution-wide).
- a External announcement window — and explicit pre-announce silence period.
- a First metrics review date.

SECTION 06

Metrics

Three to five measurable signals. Defined before launch, not after.

- a Adoption — who is using it, at what cadence.
- a Quality — what proportion of outputs pass review on first pass.
- a Risk — incidents per period, with severity.
- a Outcome — the business metric the capability is meant to move.

ADAPT BEFORE ADOPTION

This is a starter template, not legal advice or an examiner-approved policy. Replace every [bracketed] placeholder, align the language with your institution's policies, and route the final document through compliance, risk, and legal review.
